_____

Gentlemen,

I would like to ask you, if San Diego State university Graduate certificate programs in Green Industry
http://www.ces.sdsu.edu/Pages/Engine.aspx?id=540
are regionally accredited or not?

Thank you

Melad

_____

Hi Melad,

Great question!

San Diego State University is a properly accredited -- regionally accredited -- online college. They are a publicly funded university.

However, their graduate certificate online in green industry practices is a non-credit program. This means these online courses do not award degree credits and cannot be applied to any degree. These are professional continuing education courses, great for anyone looking to gain career education in the green industry sector.

All the Best
