Southern New Hampshire online MBA in Health Informatics

Posted by dmlong7 - 2011/09/04 04:49

_____

I was considering attending S. New Hampshire's online MBA in Health Informatics, but I was unsure of accreditation and how good of a program it isr. Can someone give me some insight on theirvprogram and accreditation or just the school in general.

Thanks in advance

_____

Hello DmLong,

Southern New Hampshire University is a regionally accredited private college. In terms of affordability or comparative cost its online MBA ranking is a "C" or average on the national Get Educated cost index. In other words it costs the average cost when compared factually to all other non-accsb accredited online mbas.

Get Educated does not yet have any verified student satisfaction reviews or rankings for SNHU Online and I do not believe this MBA program is ranked for quality, degree completion or other related issues by any reliable agency.

SNHU is NOT an accsb accredited online MBA BUT you may not need this type of accreditation. Click on this sentence for details on AAACSB vs. other online mba degree programs.

Perhaps students or others at SNHU Online will respond with more details on their perceptions and experiences with SNHU?

Are you specifically looking for a Health Informatics masters degree program? What factors are you looking for in your online MBA degree program?

Click here for other health informatics online degrees.

We do profile some regular (NON-mba) masters in informatics as well as masters that combine nursing and other health degrees with informatics.

Click here to review a sortable rating list of all 400 MBA distance degree programs in the Get Educated online college directory.
