Walden University

_____

Many moons ago I was asked to be a test students for Walden University's first Graduate Level Certified Online Instructor online education program. I enjoyed the program, which was 100% online and practice-based. I even used it to create and refine an online instructor teaching guide, parts of which went on to be seed content for GetEducated.com.

Any alumni out there os Walden's teaching programs online?
What did you study?
Was the program a good choice for you?

Vicky
