Hi there

Regarding information about Midtown university.
Midtown university is a diploma mill operating from Pakistan. It belongs to Salem Kureshi the one who created belford university and rochville university too. They offer life experience degrees for $1599. They claim accreditation from international accreditation organization (IAO) which it is a fake organization created by the same owner. If you'd like to know more about Salem Kureshi and his diploma mill and the universities he created just go to www.diplomamillscam.com
Be aware of this fake university.

Hello,

Midtown University is NOT mentioned on the diploma mill page you cite below regarding the Belford University lawsuit and the life experience degrees awarded by the Pakistanian citizen, Kureshi. We do however have a warning / scam report on file about Midtown University for claiming accreditation to award degrees in the USA under the authority of a fake accreditation agency, the IAO.

See The Diploma Mill Police Midtown University scam accreditation report.

All the best
Vicky

_____

They just created this university maybe 2 to 3 months ago. I know that it is not listed om the site I mentioned but they have the same owner, salem kureshi. He is hiring some semi English speaking people. If you open their chat window and you open wac university and the other related scam universities you will see that they are the same. They use fake names to answer people questions. Midtown university is a big world scam university.
