_____

Hello Bookworm,

Where do you live? Do you have any college credits now; if so how many?
Do you work in IT? Have any IT certifications? Do you have tuition assistance to help pay?

To start: Get Educated lists reviews and ratings of 330+ accredited online IT degrees. Start by looking over that list. You can sort that list by cost / student review / reputation reviews and filter it by type of degree / non-profit vs for-profit / state of operation and so on. Start there.

If you can tell us more about your situation we can help direct you.

Vicky
